## VEGALUBE 1100 SPECIAL P

### DESCRIPTION:

Vegalube 1100 Special P is a special all vegetable blend containing partially hydrogenated soybean oil and soy lecithin. It has a resistance to sticky polymerization greater than most typical oil blends.

### FUNCTION:

#### **Bakery:**

Vegalube 1100 Special P is designed to provide efficient releasing action while preventing the sticky build-up that is common with the typical 80/20 type pan oils. Its resistance to polymerization helps extend pan glaze life. Vegalube 1100 Special P has a high smoke point which helps eliminate unpleasant smoke problems in the bakery.

#### **Food Processing/Candy Production:**

Vegalube 1100 Special P provides excellent release in operations producing molded food products and sticky candy components. Its resistance to polymerization helps keep belts and molds cleaner longer.

### PACKAGE:

Bulk

Plastic Pail - 35 lbs. Net

55 Gallon Steel or Fiber Drum – 415 lbs. Net

270 Gallon Tote – 2075 lbs. Net
